# Cost of Dental Implants

# Factors influencing the range of costs:

Geographical Area

Dentist's credentials

Lab cost

Restorative materials

Implant Type

Sedation

Extractions

Dentists categorize implant treatment in "units" or "arches".

One unit = One tooth

One arch = upper or lower jaw

Full Mouth = both upper and  
lower jaws

Single unit implant  
restorations are the most  
expensive, per unit.

Single tooth implant restorations  
have three pieces:

Implant  
Abutment  
Crown

Single tooth implants:

\$3,000 – 10,000 per tooth

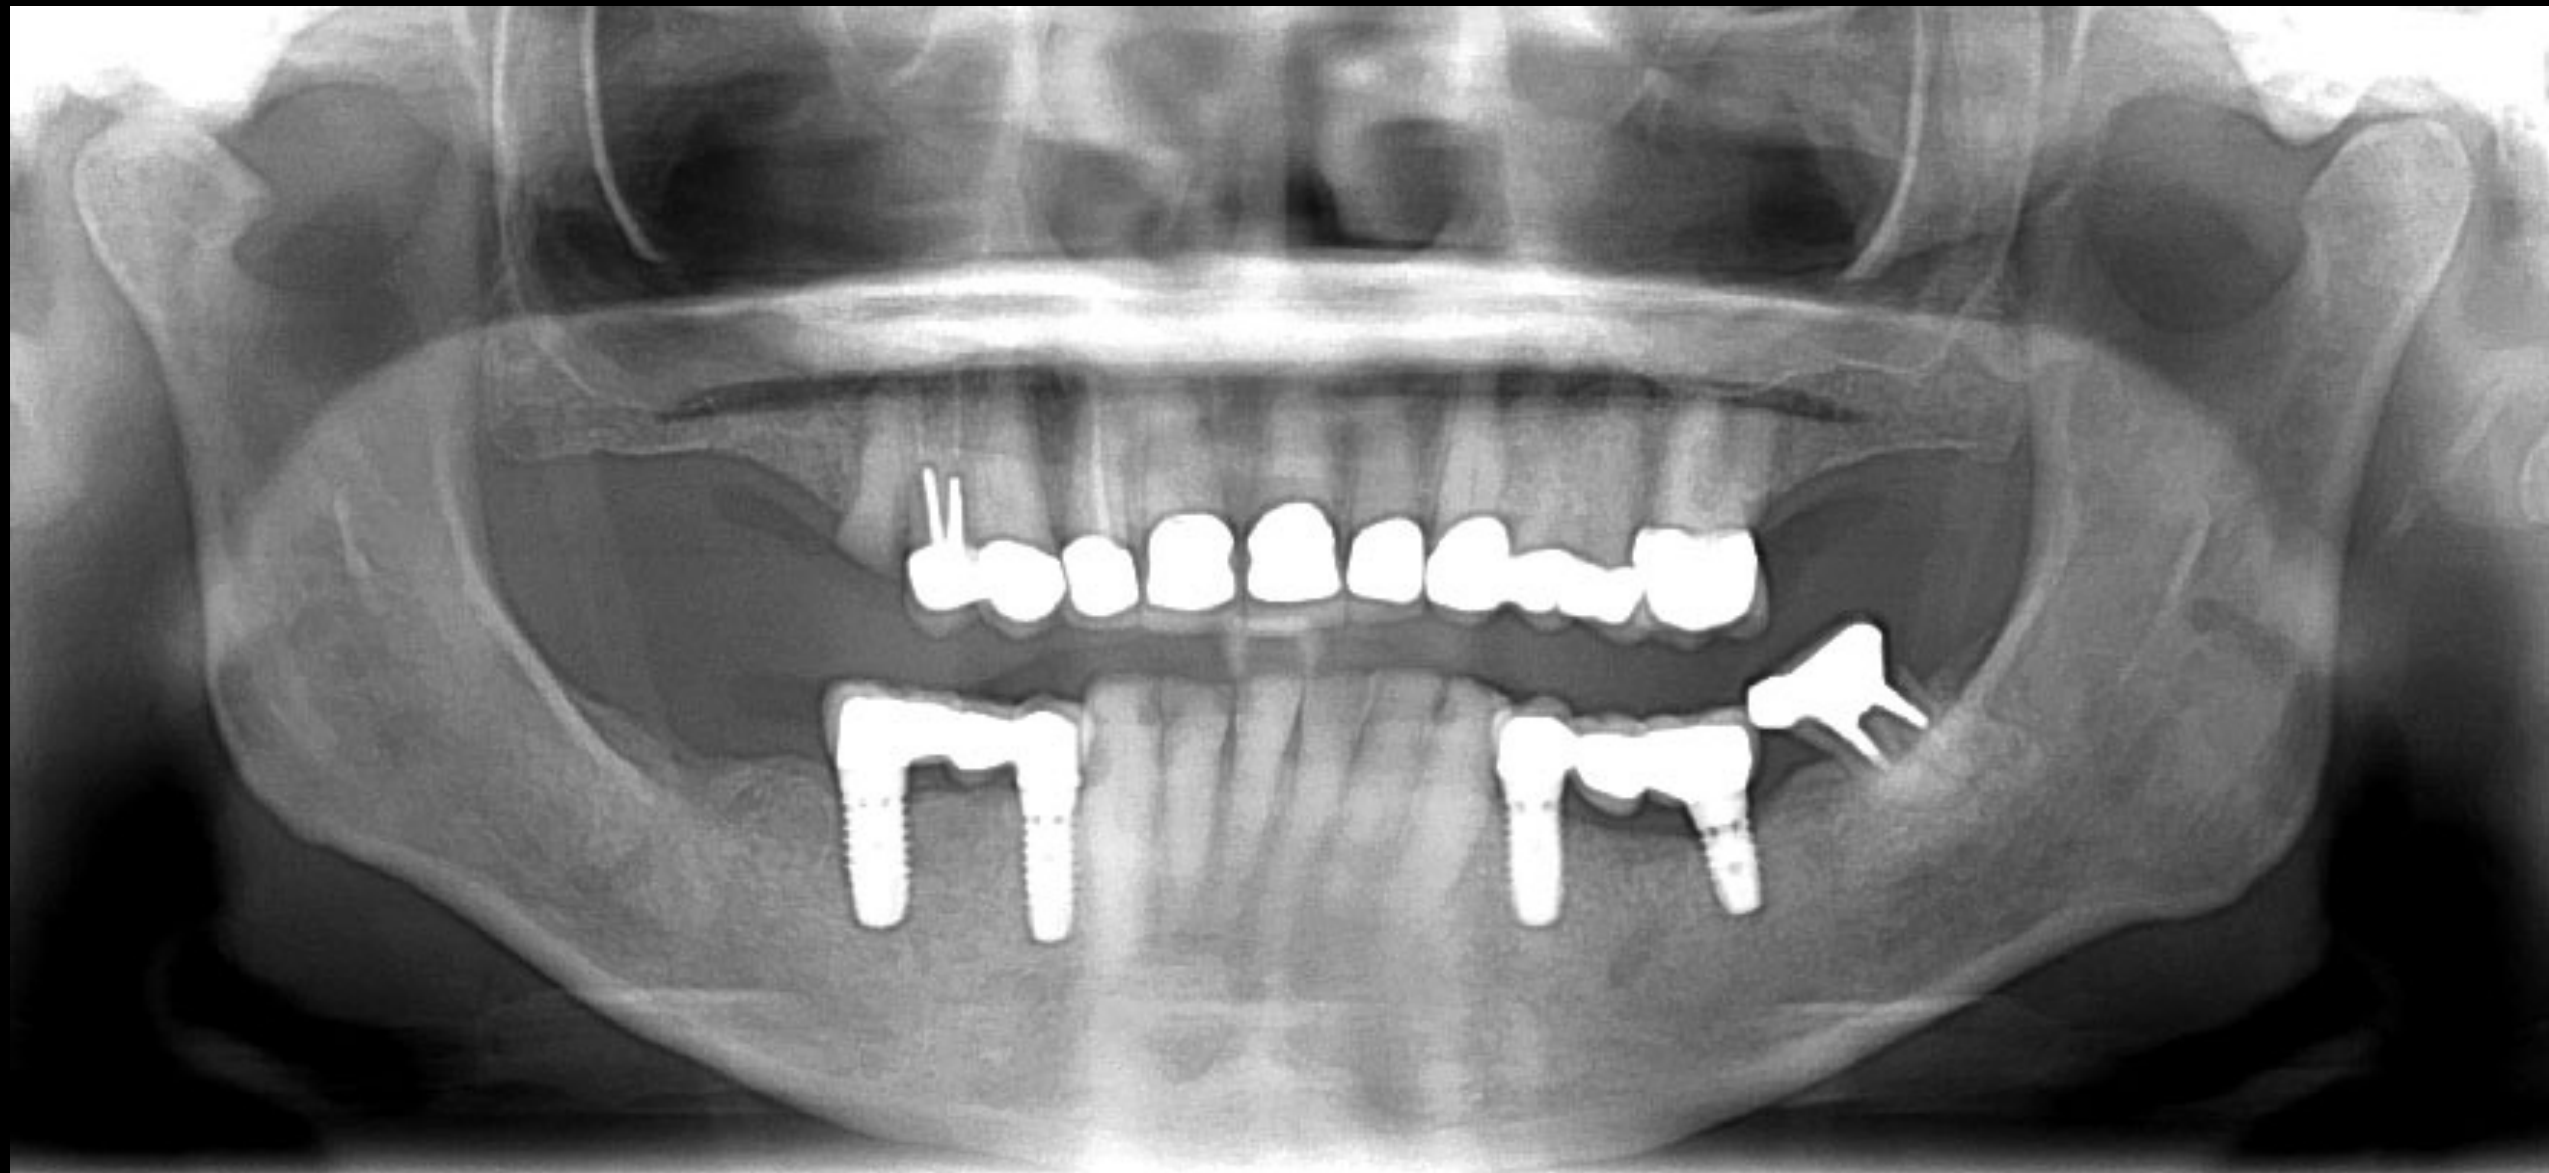

Bridges or multiple-unit restorations are a lower cost per unit because there is not a 1:1 ratio of implants to teeth.

Multiple-unit implants (bridges):

\$2,500 – 7,500 per tooth

# Full Arch or Full Mouth Treatment

Overdentures (removable)

All-on-4 (hybrid prostheses)

Implant Bridges

# Overdentures (removable)

## All-on-4 (hybrid prostheses)

## Implant Bridges

# Overdentures (removable)

Per arch

Mini Implants x 2 = \$2,000 – 6,000

Mini Implants x 4 = \$4,000 – 12,500

Regular Implants x 2 = \$6,500 – 12,500

Regular Implants x 4 = \$10,000 – 17,500

Overdentures (removable)

All-on-4 (hybrid prostheses)

Implant Bridges

All-on-4, All-on-6, All-on-X (Hybrid)

Acrylic over titanium \$15,000 – 25,000

Zirconium \$16,500 – 30,000

Overdentures (removable)

All-on-4 (hybrid prostheses)

Implant Bridges

# Implant Bridges

Look, feel, function and clean  
like natural teeth

START

# Implant Bridges Per Arch

\$30,000 – 45,000

# Factors influencing the range of costs:

Geographical Area

Dentist's credentials

Lab cost

Restorative materials

Implant Type

Sedation

Extractions

# Thank you !
